

Tripod Turnstile. SAP123

Dimension:

Integration:

Can be connected to various readers and access control system

Parameter:

- Power supply: 220V 50HZ
- Power consumption: 32 W
- Driving voltage: 24 V
- Walkway width: ≤ 550 mm
- Dimension: 1200x280x980 mm
- Speed: 25 persons /minute
- Working temperature: -25~ +70
- Material: 304 stainless steel

Control mode:

- Access control system: can be easily connected to various access control system, controlled via IC/ID card reader / barcode reader/ or all other types of readers
- Arm drop automatically, upon power failure

Operation direction:

- Both directions controlled;
- One direction controlled and one direction free
- Both directions free
- Can be easily set according to actual project requirements

Application diagram:
